Art-Unit: 1773

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, 18-20, drawn to an article, classified in class 428, subclass 694tc.
  - II. Claims 14-17, drawn to a process, classified in class 427, subclass 580.
2. The inventions are distinct, each from the other because:
3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product may be made by another and materially different process such as plasma CVD of carbon in an atmosphere containing nitrogen.

Note that the examiner has included claims 18-20 which are directed to an apparatus in group I. This has been done since the apparatus is considered nominal. However should applicants elect group I and later add substantive limitations to claims 18-20 which are other than limitations to the magnetic recording medium then claims 18-20 will be withdrawn as directed to a non elected invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1773

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
